REACT UI CLONE Craft 2026

Build Like Netflix. Think Like Spotify. Create Like a Front-End Engineer.

EVENT OVERVIEW

The React UI Clone Challenge 2026 is a hands-on front-end development competition designed to strengthen React JS, JavaScript, HTML, and CSS skills through practical UI development. Participants can practice and demonstrate their React concepts by creating a UI clone of any popular application interface. Examples such as Netflix, Spotify, Amazon, and Zomato are provided only as reference ideas.

EVENT DETAILS

· Duration: 2 Hours
· Mode: Individuals
· Technology Stack: React JS, JavaScript, CSS
· AI Usage: Minimal (Manual Coding Preferred)

Earn Learning Hrs : 2hrs

CHALLENGE THEME (EXAMPLE)

Build a UI Clone of any popular web or mobile application using React JS. The examples below are for practice and reference only:
· Netflix
· Spotify
· Amazon
· Zomato
· Any similar application UI of your choice

PARTICIPANT CHECKLIST

☐ Laptop & Charger

☐ Node.js & npm Installed

☐ VS Code Installed

☐ React Environment Configured or JavScript , CSS, and HTML

☐ Sample React App Executed

☐ Review Components, Props, State, Event Handling, Responsive Design

SUBMISSION CHECKLIST

☐ Complete Mandatory Features

☐ Verify Responsiveness

☐ Remove Errors
☐ Organize Source Code
☐ Be Ready for Evaluation

Key Skills Covered

- React Fundamentals
- Functional Components
- Component Reusability
- Props and State Management
- Event Handling
- Conditional Rendering
- Responsive UI Design
- CSS Flexbox & Grid
- CSS Animations and Transitions
- Modern UI Development Practices

Expected Features

Mandatory Features

- React Component Architecture
- Responsive Layout
- Navigation Bar
- Hero Section
- Cards/List Rendering
- Interactive UI Elements
- Clean Code Structure

Bonus Features

- Dark/Light Theme Toggle
- Search Functionality
- Filtering Components
- Loading Animations
- Custom UI Enhancements

Event Rules

- React JS must be used for development.
- Participants should write code manually.
- Excessive use of AI-generated solutions is discouraged.
- Judges may ask participants to explain component structure and implementation.
- Reusable React components should be created wherever applicable.
- Source code submission is mandatory

Learning Outcomes

By participating, students will:

- Build a real-world React application
- Understand component-based UI development
- Create responsive modern interfaces
- Apply industry-standard front-end practices
- Improve problem-solving and coding skills
- Gain portfolio-ready project experience

"Don't Just Use Apps. Build Them."
